Natural Beauty of Wood Fence Design

Alternating Board

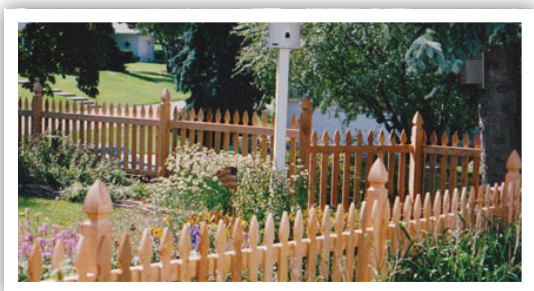

Western Red Cedar has the natural preservative, Tannin, in every fiber. Cedar can be left natural and will age to a rich silvery color. It takes clear oils, stains or paint equally well.

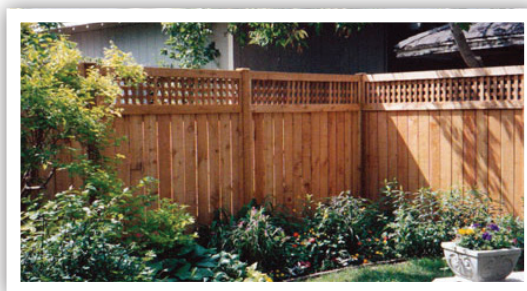

Legacy Batton Board with Imperial Tops

Meeting a Specific Need with Design

Picket Tops

Post Tops

Highland Trellis

Broadmoor Trellis

Our goal has always been to build Quality Fences that provide our customers with the best value for their investment. We strive to provide a competitive price without sacrificing the quality of workmanship or material used.

Established in 1978, we are a full service fence company stocking materials of wood, ornamental, chain link and vinyl.

We only use #1 grade of Western Red Cedar in our wood fences. Our other wood products include Mountain Split Rail and Post and Board.

We carry the Jerith Ornamental Fence Line. Jerith uses a patented FencCoat Powder Coating system which is both long lasting and environmentally friendly.

We carry Residential and Industrial Chain Link in both Galvanized and Vinyl Coated.

All of our materials adhere to the highest industry standards.
